git

Gulp

Webpack

Summary

Hello there! How are you? ;D
So, I'm a Front-end Software Developer about 3 years and I love my job. Recently I'm working with ecommerce front-end development. My study focus in this time have been JavaScript. If you want we can talk to know better me, it'd be a pleasure!

Personal

A little more about me... I like so much coffee and I use to work listening music. In my free time I like to read webcomics, watch anime, study about new css features and watch gastronomy TV shows.

Node.js

Shell script

React
